

# Action Steps

In this module we learned:

- How to imitate others and what ideas to note down (so you can make them your own)
- What software and process to use for capturing ideas from different mediums
- How to use The Epistemic Method to create new knowledge and ways of understanding
- How to start building your Digital Reality to separate yourself from your competition
- How to use your database of ideas to create fusion content and bring unique perspectives to the table
- All in all, this is a holistic approach to understanding and monetizing your life.

## Lever Moving Actions

Again, with all of this, don't bite off more than you can chew.

It is better to be aware of these things and eventually work to incorporate them in your process than it is to try incorporating them and end up not getting anything done.

### 1) Continue Growing & Studying

Are you writing 1-3 tweets a day?

Are you engaging with others to get eyes on your account?

Are you connecting with people and creating mastermind groups?

Are you actively consuming information in alignment with your interests?

No? Stop what you are doing and focus on those. Nothing else matters until those are habit.

### 2) Start Developing Your Ideas

Take your ideas from The Queue and run experiments, make discoveries, formulate processes, and eventually create theories or concepts.

This is what will bring a unique view to your newsletters, products, lead magnets, and anything else you plan to create.

This is how you go from commodity to irreplaceability.

### 3) Start Testing and Streamlining Your Content Flow

You aren't going to decrease your work times if you aren't intentional about it.

When you test new ways of doing things, you uncover problems faster — meaning you can learn about them and solve them faster (and teach your audience how you did it!)
